

DSBD 6

Code:

```
1 from fastapi import FastAPI
2 from routes.admin import router as admin_router
3 from routes.catalog import router as catalog_router
4
5 # 1. Initialize FastAPI application named "BookFlow Library API"
6 app = FastAPI(
7     title="BookFlow Library API",
8     description="A complete library management REST API featuring catalog browsing and admin",
9     version="1.0.0",
10    docs_url="/docs",
11    redoc_url="/redoc"
12)
13
14 # 4. Register both
15 app.include_router(catalog_router)
16 app.include_router(admin_router)
17
18
19 @app.get("/", tags=["General"], summary="Root / Health Check")
20 def root():
21     return {
22         "message": "Welcome to BookFlow Library API",
23         "status": "healthy",
24         "docs_url": "/docs",
25         "redoc_url": "/redoc",
26         "routes": {
27             "catalog": [
28                 "GET /books",
29                 "GET /books/{book_id}",
30             ],
31             "admin": [
32                 "POST /admin/books",
33                 "PUT /admin/books/{book_id}",
34                 "DELETE /admin/books/{book_id}",
35             ],
36         },
37     }
38
```

Output:

BookFlow Library API

1.0.0 OAS 3.1

/openapi.json

A complete library management REST API featuring catalog browsing and administrative operations.

Catalog

GET	/books	Get all books	⌵
